Project Title: Pebble Cu-Au-Mo Project

Lead Federal Agency: Corps (likely)

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Jack DiMarchi, (2) DEC Leads: Allan Nakanishi (WW), (3) Lori Aldridge (SW), (4) EPA Leads: Rick Parkin (PM for BBWA), (5) Cindi Godsey (WW), (6) Heather Dean (404), (7) Corps Leads: Katie McCafferty, (8) Pebble Ltd. Partnership: Tim Havey

<p>Pebble Project is a very large copper-gold-molybdenum mineral deposit located 200 miles southwest of Anchorage on state land. It contains components that, if developed, would likely involve both a large open-pit surface mine and an underground block cave operation. The project was in an advanced state of exploration, but is now in care & maintenance status owing to departure of partner Anglo American who was funding the project as part of their earn-in agreement with owner Northern Dynasty Minerals.</p> <p>~27,000 pages of baseline study results for the time period 2004-2008 were previously released</p> <p>Proponent is the Pebble Limited Partnership (Anglo-American and Northern Dynasty). However, in September 2013 Anglo pulled out of the partnership. Northern Dynasty reduced staff in Anchorage and is seeking financial options.</p> <p>The project would require road access and a supply of power in addition to the project's mining footprint. Mine life could be 50-100 years, possibly more.</p>	<p>No permitting schedule presently. Project on care and maintenance status approximately seven years.</p> <p>Still in pre-application phase.</p>	<p>EPA is undergoing a process under Clean Water Act 404(c) to identify options to protect the world's largest sockeye salmon fishery in Bristol Bay, Alaska. EPA released the final Bristol Bay Watershed Assessment (BBWA) on January 15, 2014, and is currently developing a "Proposed Determination" under Section 404 (c).</p> <p>On April 29, 2014, EPA received letters from the Pebble Limited Partnership and the Alaska Attorney General in response to our February 28 information request under Clean Water Act Section 404(c). EPA is reviewing their submitted information thoroughly before deciding whether to move forward with any action to protect Bristol Bay fishery resources.</p> <p>Information is available at http://www2.epa.gov/bristolbay and http://dnr.alaska.gov/mlw/mining/largemine/pebble/bbwa/</p> <p>On January 9, 2014, PLP sent a letter to EPA's Region 10 Inspector General challenging the substance and value of the BBWA and requesting</p>	<p>Coordination of Pebble at DNR/MLW now with Large Mine team based in Fairbanks. (Jack DiMarchi, Brent Martellaro, Carolyn Curley).</p>

MINING PROJECTS

Description & Link	Schedule	Federal	State
<p>The project is the focus of national attention/opposition. In response to a petition from nine tribal governments, EPA has initiated a watershed assessment of the Nushagak and Kvichak watersheds in Bristol Bay under the authority of Section 404(c) of the Clean Water Act.</p> <p>Rio Tinto has announced that it is re-evaluating its involvement in the project.</p>		<p>an investigation relating to bias. On May 2, 2014, the EPA announced that the Office of the Inspector General will begin preliminary research to determine whether the EPA adhered to laws, regulations, policies and procedures in developing its assessment of potential mining impacts on ecosystems in Bristol Bay, Alaska.</p> <p>The Corps of Engineers drafted a letter to the project proponents advising them that their proposed functional analyses for streams, wetlands, and marine waters are inadequate and will require adaptation/revision through the efforts of an interagency working group. The Interagency working group is engaged.</p>
